iSpring WRO4000 Whole House Reverse Osmosis System
Unboxing and Safe Handling

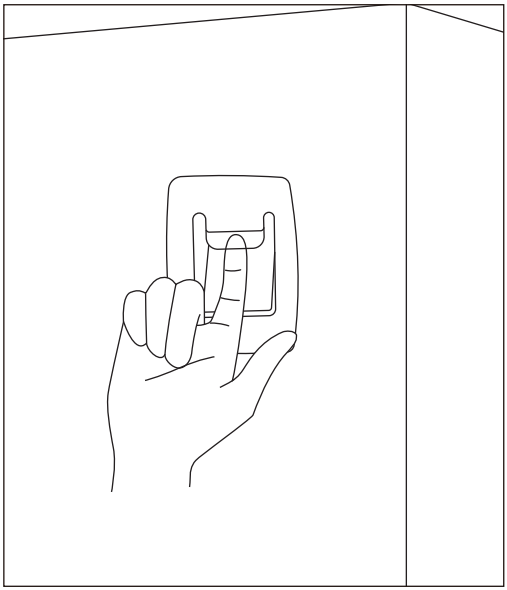

Ver. 06/2026

1 Cut and remove the packing straps. Then, take off the lid.

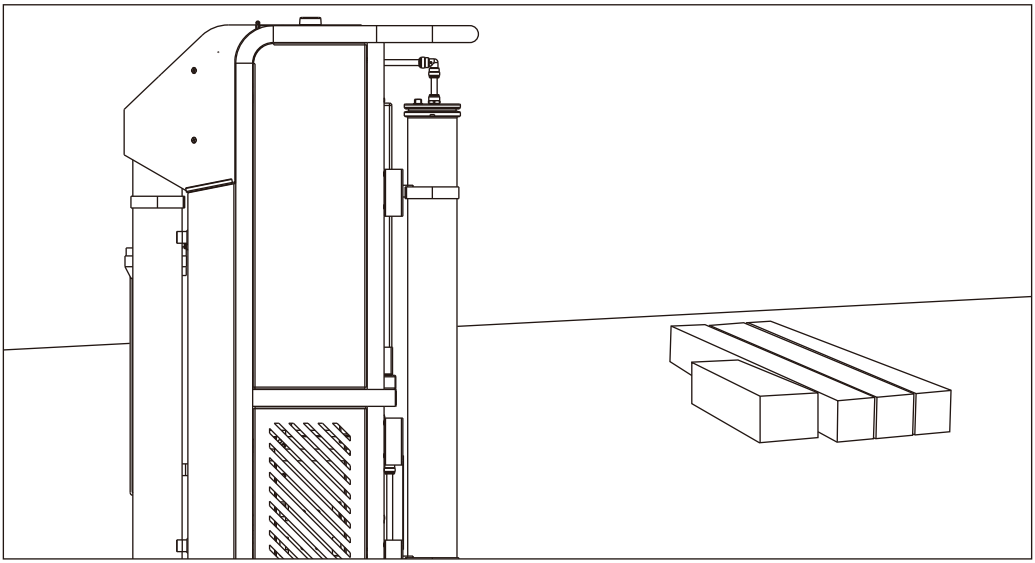

WARNING: Two-person lifting is required.

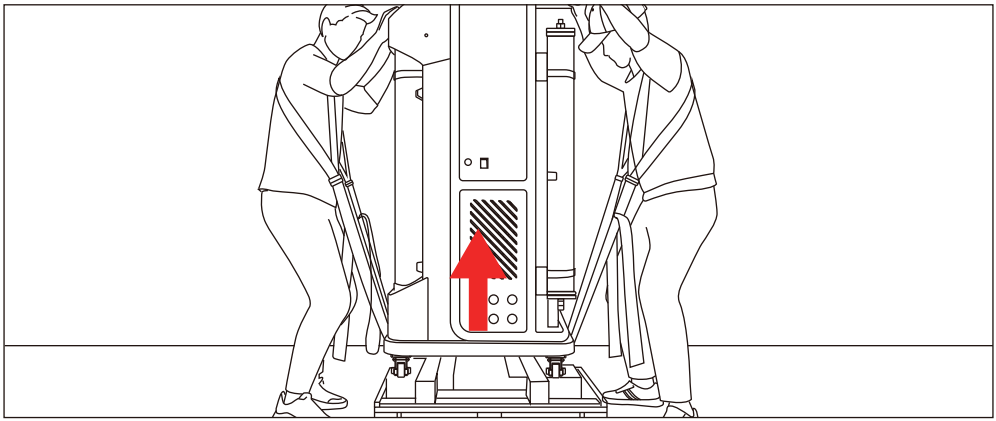

2 Lift the hook to detach the side locking clips and release the box.

3 Remove the wrapping on the system and **take out the filters**.

4 Lift the system from the sides and remove it from the pallet. Use **moving straps** to raise the unit safely.

5 One side of the system has the power cord and water ports. Do not lift or support the system from this side to prevent damage to cables, fittings, or components. When moving the system using a dolly or cart, place the flat side against the surface to ensure stability and prevent tipping.
Place the system indoors, such as in a basement or other safe, dry locations.
